Wait... MAPs helping minor MAPs?

- What minor attraction is and is not
 - Pedophilia, hebephilia, ephebophilia
- Staff backgrounds and hating sexual abuse
- Staff financial resources and therapeutic connections
- Staff culture of accountability and transparency
- Limiting our liability as staff
- Trust-based culture and tie-ins to community reputation

How Prostasia became involved

- Prostasia Foundation is a CSA prevention organization that is sex-positive and rights-focused
- We were formed in 2018 in response to FOSTA by experts promoting a more evidence-based approach
- Many of these experts first collaborated on a 2018 joint letter to Twitter about its censorship of MAPs
- Discord declined to engage with us about MSC

How Prostasia supports MSC

- We do not own, oversee, or moderate MSC
- Prostasia Foundation provides MSC with:
 - Domain registration and hosting
 - Raising and administering funds
 - Point of contact for legal demands and requests
 - Partnership and collaboration with experts
- We have access to some but not all trusted channels

Managing legal liability and optics

- A chat server for pedophiles, including minors?
What could possibly go wrong?!
- Due to the risk of legal liability and to address public skepticism we are working with MSC on:
 - Evaluating and implementing technologies for automated hash-based content scanning
 - Fine-tuning MSC's rules about private messaging
 - Recruiting experts to join the #therapy channel

Conclusion

- Major Internet platforms are not a safe space for law-abiding MAPs seeking support and community
- MAPs trust MSC because it belongs to them
- Professionals have also identified MSC's value
- Prostasia's partnership with MSC is about:
 - Preserving what has been working well
 - Addressing valid concerns about safety and optics
 - Ensuring MSC has legal and professional support
